

```
class Clock {
  constructor() {
    this.updateTime();
  }

  updateTime() {
    const now = new Date();
    this.hours = now.getHours();
    this.minutes = now.getMinutes();
    this.seconds = now.getSeconds();
  }

  displayTime() {

    console.log(`${this.hours}:${this.minutes}:${this.seconds}
  `);
  }

  start() {
    setInterval(() => {
      this.updateTime();
      this.displayTime();
    }, 1000);
  }
}

const clock = new Clock();
clock.start();
```
